ACCESSORIES

BAGVAC

BagVac™ Key Features:

- Powerful fully-enclosed suction unit for the heavier workload.
- Removes anything from dust up to 50 mm debris
- Operated via a standard 32 amp 3 phase power supply, or independent diesel generator
- Collected material disposed directly into a bag or skip, or back into the process
- Fitted with forklift sleeves so fully mobile
- Exceptional filtration levels, including optional HEPA filters, ensures dust-free collection
- Suction distance up to 200 metres
- Suction capacities up to 6 tonnes an hour
- Range of flexible hoses, tools and extensions - no area is inaccessible
- Labour saving - cleans up in minutes what can take days done manually
- Easy to operate
- Quiet in operation
- Small footprint
- Can also be used for powering fixed pipe work vacuum systems around multi- floor sites
